

# PRESS RELEASE

## FATA AUTOMATION TO PROVIDE TURN-KEY SKID CONVEYOR SYSTEM FOR GALLAGHER KAISER AT GM SLP IN MEXICO

*Project includes skid conveyor modules, production, paint and oven chain conveyors.*

### **Auburn Hills, MI, March 14, 2022:**

FATA Automation is pleased to announce that it has been awarded a material handling project for Gallagher Kaiser at the General Motors San Luis Potosi Paint Shop in Mexico. This project allows for the plant to produce two-tone paint on the bodies of the Chevrolet Equinox and GMC Terrain crossovers.

FATA Automation, a global leader in the supply of skid conveyor modules and systems, will be providing a turn-key system that will incorporate power roll beds, power roll stands, eccentric lift roller pop-up tables, cross transfers, and process conveyors including dual-strand and mini flat-top designs for production, paint and oven operations. The overall length of the module installation will be just under 1 mile once completed.

The project is expected to be completed by Spring 2023.

*FATA Automation is a global company with expertise in design, engineering, manufacturing, fabrication, installation, start-up and training of material handling systems. For over 85 years, FATA Automation has been supporting manufacturing companies worldwide for a variety of industries including automotive, heavy equipment, engine, marine, defense, renewable energy and vehicle parking.
